

***BECAUSE OF YOU...
Our Donors***

We have funded one research grant this year -- and are looking forward to funding more research this summer!

With the ongoing and predictable support of our [Visionary Alliance](#) members we envision that future grants can be more substantial and numerous.

Our Aspiration: To supply a significant portion of the needed funds for such major deserving projects.

How Can We Get There? With your help! We invite you to contribute today and into the future. As a Thank You for joining the [Visionary Alliance](#) by the end of the year, your name will be entered into a drawing for a **\$100 Amazon Gift Card!** Joining the Visionary Alliance makes you a part of ensuring the growth and acceptance of EMDR. For a pledge of at least \$15/month you can be a part of this important and attainable goal.

This year's Research Award went to **Bessel van der Kolk, M.D. and Ruth Lanius, M.D., Ph.D.** for their proposed research on "*Functional Neuroanatomy of Bilateral Eye Movements During Trauma Script Imagery.*" It is a potential groundbreaking study on the neurobiological mechanisms involved in EMDR. The required funding for this proposal is \$70,000. We were able to fund to our current maximum grant of \$10,000.

If you are already a part of the Visionary Alliance, invite a colleague to join the Visionary Alliance, AND increase your current pledge by 50% or more.

BE PART OF THE FUTURE!

***Contribute Now* ⇒**

.....

Thank you for all you do and your support of EMDR.
