Medicine Uses

Alprazolam, commonly known by the brand name Xanax, is a medication used to treat anxiety and panic disorders. It belongs to a class of medications called benzodiazepines, which work by enhancing the effects of a neurotransmitter in the brain called GABA.

Alprazolam works quickly to relieve symptoms of anxiety and panic attacks, making it a popular choice for those who suffer from these conditions. It can help calm the mind and body, reducing feelings of stress and fear.
